

4200 EPOXY PRIMER

STRONG ADHESION TO CONCRETE AND CAN BE ACCELERATED FOR A ONE-DAY INSTALLATION

The 4200 Epoxy Primer is part of our Performance product line, delivering outstanding quality and great value on your investment. It is a 100% solids, two-component epoxy that develops a strong bond with the concrete. The 4200 Epoxy Primer can withstand moisture pressure of up to 5lb MVE. Designed as a base coat for our flake, the 4200 Epoxy Primer provides a great foundation for subsequent applications of Versatile

products to create the desired result for your customer. Another benefit of the 4200 Epoxy Primer is its ability to be accelerated, allowing for a one-day installation. This is ideal for jobs that are in colder temperatures or on a tight installation timeline. The 4200 Epoxy Primer comes in clear and three colors. The clear coating can be pigmented with our Universal Pigment Packs for additional colors.

THE VERSATILE DIFFERENCE

- Designed to receive flake uniformly
- Can be accelerated for one-day installations
- Strong adhesion to concrete floors
- Modular design for color to be post-added
- Low odor
- Low VOC
- 100% Solids
- Cures in the presence of high humidity
- Withstands up to 5 lbs MVE
- Low viscosity allows for easy application
