5020 CA CLEAR POLYASPARTIC TOPCOAT

EXTENDED POT LIFE FOR GOOD WORKING TIMES

Designed for easier application with good working time, the 5020 CA Clear Polyaspartic Topcoat is a two-component, high-build polyaspartic with over 80% solids. Developed for contractors in California, this product offers good working times with a reduced dry time for a quicker return to service. Floors can be walked on in 5 hours and driven on in 72 hours.

The extended working time makes this product ideal for humid environments, allowing moisture to evaporate during curing.

For the best results, apply the coating when humidity is low and during the coolest part of the day to prevent condensation and achieve a clearer finish.

Part of our Performance product line, the 5020 CA Clear Polyaspartic provides high-quality results at an affordable price. 5020 CA delivers a beautiful, high-build topcoat with a long-lasting, high-gloss finish, perfect for residential, commercial, and industrial concrete floors.

THE VERSATILE DIFFERENCE

- High-Build
- Reduced Dry Times
- Extended Working Time
- Pot Life of 55 minutes +/-
- Low Odor
- Resistance to Most Chemicals
