5108 HIGH-SOLIDS FAST-DRYING CLEAR POLYASPARTIC

HIGH-GLOSS TOPCOAT FOR RESIDENTIAL, COMMERCIAL, AND INDUSTRIAL SPACES

5108 High-Solids Fast-Drying Clear Polyaspartic is designed for use over industrial, commercial, and residential concrete floor coatings and stains, providing a beautiful clear gloss finish. It features a low viscosity that makes it easy to apply while providing an even longer pot life and a faster cure when applied onto the surface. The cross-linking of the film in the cure makes it exceptionally tough and durable, making it more abrasion-resistant than most epoxy topcoats.

As a result, the 5108 Polyaspartic is extremely user-friendly without sacrificing the performance of the finished product, making it ideal for high-end residential applications, retail settings with high traffic, or food service areas where stain resistance and cleanability are important. The 5108 Polyaspartic is part of our Performance line of products, delivering high-quality products at an affordable price.

FEATURES & ADVANTAGES

- Dries quick
- 4 times more abrasion resistant than epoxy
- Low VOC
- High-gloss
- High-build
- Great resistance to most chemicals
- Non-yellowing
- Will cure at temperatures just above freezing
