PERFORMANCE FLAKE SYSTEM

TRANSFORM ANY RESIDENTIAL, COMMERCIAL, OR INDUSTRIAL SPACE

Delivering exceptional value to our customers, the Performance Flake System offers a balance of affordability and quality. This Performance Flake System enhances aesthetic appeal while protecting the underlying substrate. Its composition includes our 4200 Epoxy Primer that penetrates the concrete and establishes a remarkable bond capable of withstanding up to 8 lbs. of moisture vapor emission (MVE).

The Performance Flake System is low VOC, ensuring compliance with SCAQMD regulations. By utilizing blended flakes, the Performance Flake System achieves a stunning multi-color finish with either the 5108 Fast-Drying Clear Polyaspartic or the 5020 Ultra-High Solids Polyaspartic topcoat. These topcoat options provide a gloss finish with good resistance to chemicals and wear.

THE VERSATILE DIFFERENCE

- Advanced "Wicking" Technology for Superior Bond
- Seamless, Impact and Abrasion Resistant
- Can be Applied in One Day
- Hot Tire and Chemical Resistant
- Low VOC
- Non-Flammable & Low-Odor Options
- Durable and Easy-to-Clean
- Indoor or Outdoor Use
- High Moisture Vapor Emissions (MVE) Resistance
- Non-Yellowing
