WATER-BASED PIGMENTED SYSTEM

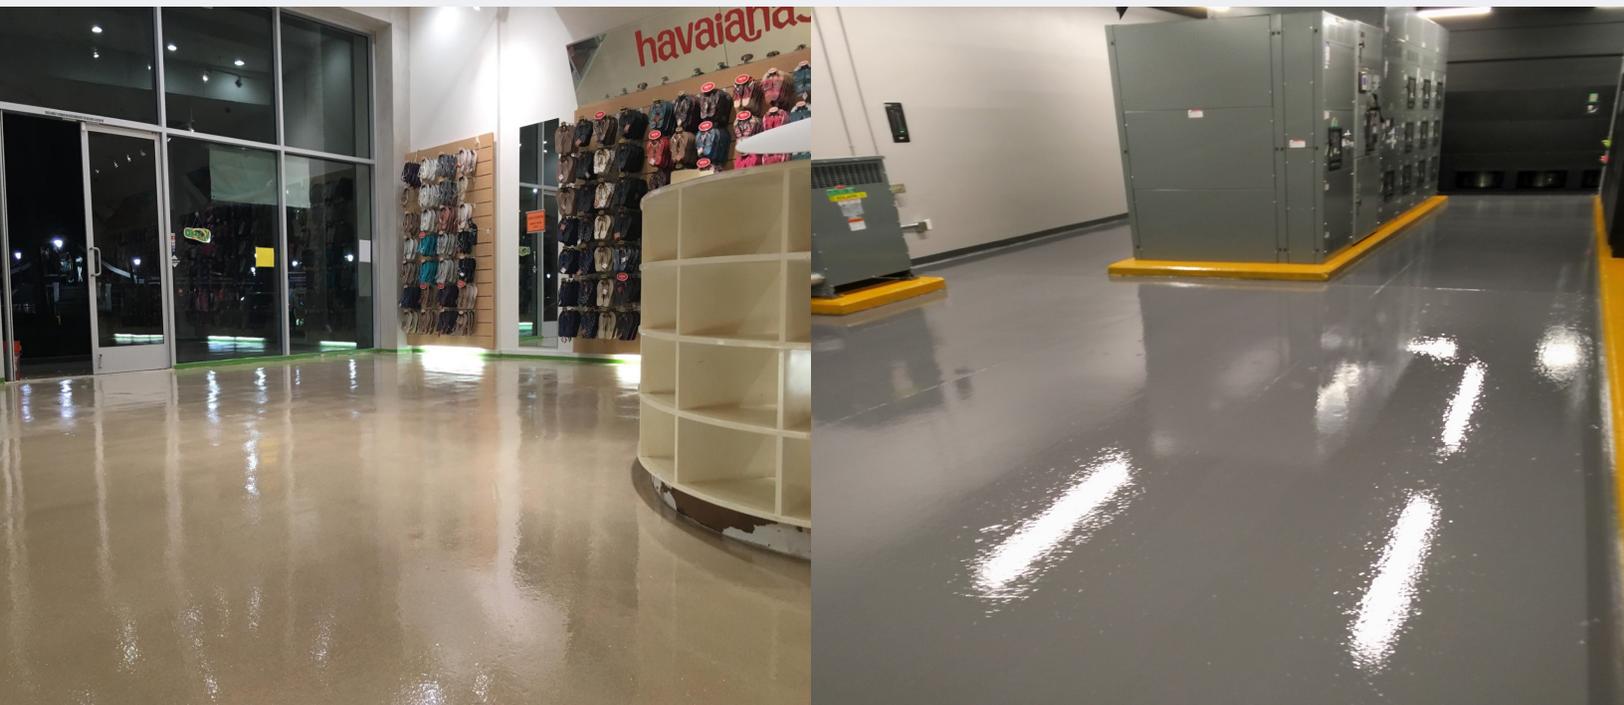

A BREATHABLE AND DURABLE FLOOR SURFACE FOR COMMERCIAL & INDUSTRIAL SPACES

The Water-Based Pigmented System uses our 4010 Waterborne Pigmented Epoxy primer to create a breathable and durable floor surface. It not only enhances the appearance of the concrete substrate, but also protects it from abrasion, wear, UV and chemical damage.

A second coat of the 4010 Epoxy can be applied to further enhance its durability and overall wear resistance. As part of the Performance product line, the Water-Based Pigmented System combines affordability and quality, ensuring remarkable value for our customers.

THE VERSATILE DIFFERENCE

- Low Odor
- Water-Based
- Moisture Vapor Emissions (MVE) Tolerant
- Provides Solid Color Sealed Finish to Concrete
- Bonds to Damp Concrete Floor Surfaces
- Great Resistance to Most Chemicals
